EUROGAMMA S.p.A.

Summary of Project: "In Search of Excellence for EUROGAMMA S.p.A."

The Project in question was financed under the 2020 Investment Fund Call by POR CREO Regione Toscana ACTION 3.1.1. sub-action 3.1.1a3. Through this initiative, EUROGAMMA S.p.A. intended to support several investments aimed at containing and combating the COVID-19 epidemiological emergency, and therefore guarantee the safe resumption of its economic activities.

The Project included investments such as: machinery and equipment, sanitisation costs and protective devices, the replacement of heating systems for energy efficiency, and the insertion within the Company of a Robotic (digital) System to optimise warehouse activities (vertical warehouse).

Moreover, an important tool was also introduced, able to improve the Company's competitiveness; this tool consists in an articulated remote assistance system, now available across the entire range of hydraulic lifts produced by ourselves, and able to connect all our equipment (regardless of where it is used) with our Help Desk, allowing continuous monitoring of its functionality, in addition to performing a broad range of checking/updating/maintenance works by remote.
